**Discover
Pre-Engineered Metal
Buildings**

Let Foremost be your trusted
PEMB partner.

What's A Pre-Engineered Metal Building?

Pre-Engineered Metal Buildings (PEMBs): are steel structures fabricated off-site and assembled quickly on location.

Advantages:

- Faster build times
- Predictable, cost-effective construction
- Clear-span design flexibility
- Engineered to meet code
- Easily expandable for future growth

Color & Profile Selection Guide

We offer a broad selection of panel profiles and gauges to meet your project's needs. All Signature® 200 and 300 finishes are Cool Roof compliant.

- Select Your Panel Profile
- Choose Your Color (Use color chip samples for final choice)
- Determine Optimal Gauge (Standard options: 22, 24, 26, 29)

**Ask your Sales Rep for our
Panel Color Chart and
Samples.**
